

HAVELLS

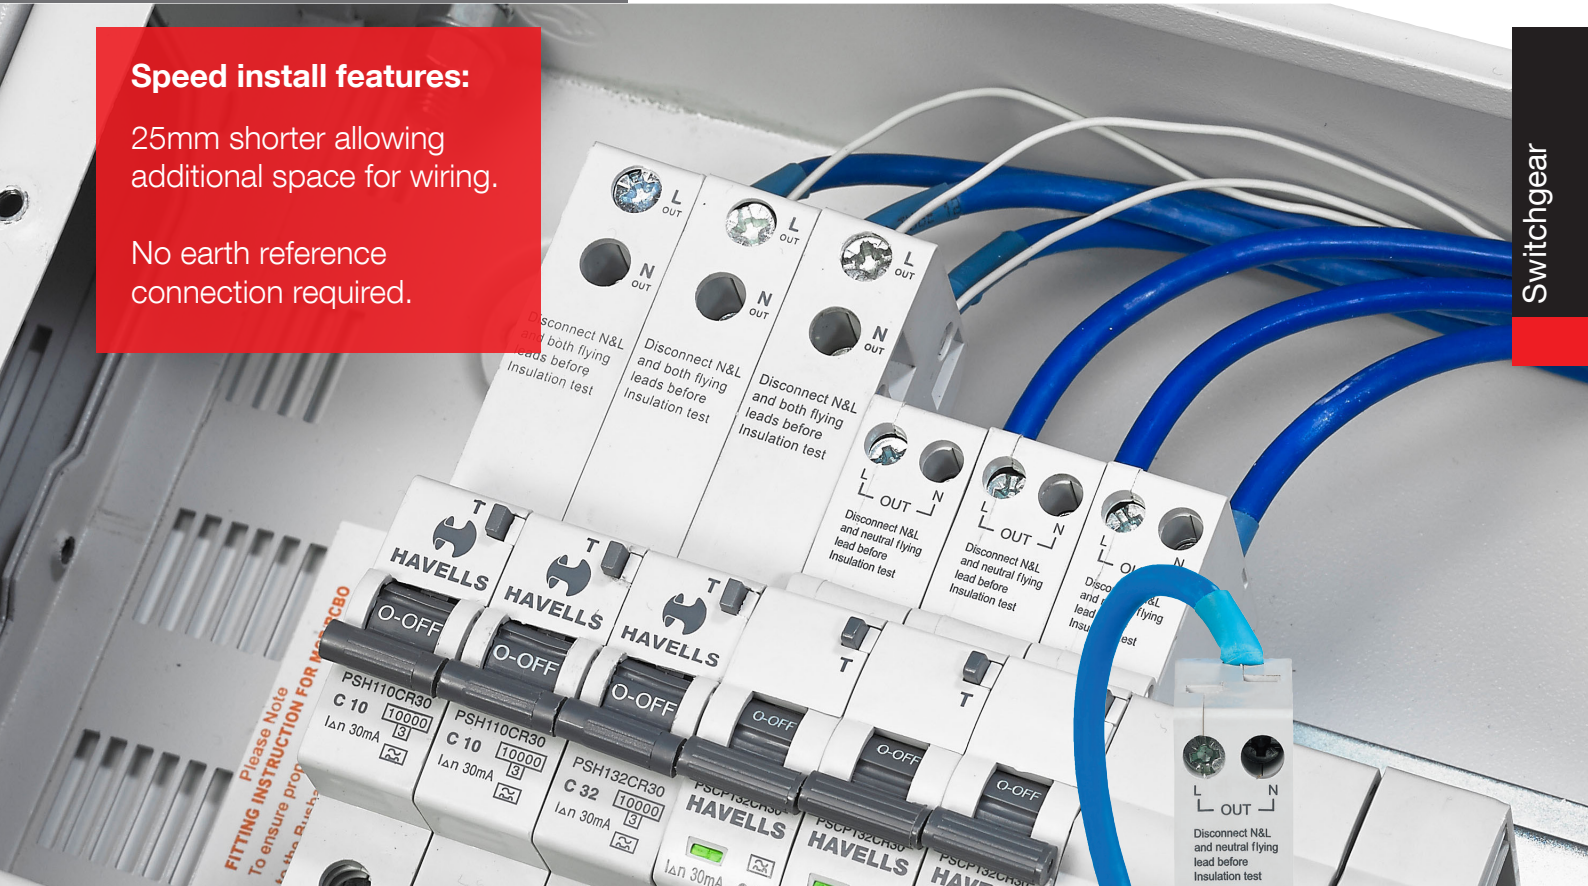

Havells Compact RCBO

Speed install features:

25mm shorter allowing additional space for wiring.

No earth reference connection required.

Switchgear

Our compact RCBO is 25mm shorter than the standard RCBO range, simplifying installation and creating additional cabling space in distribution boards.

In addition, the uniquely designed compact RCBO does not require an earth reference connection which will reduce installation time.

The range is fully compatible with all Havells PowerSafe distribution boards and is available in various current ratings in both B and C trip curves.
